

MIRACLE SERIKI DIGITALS LIMITED

Digital Project Portfolio & Case Studies

**200+ VERIFIED DIGITAL PROJECTS
COMPLETED**

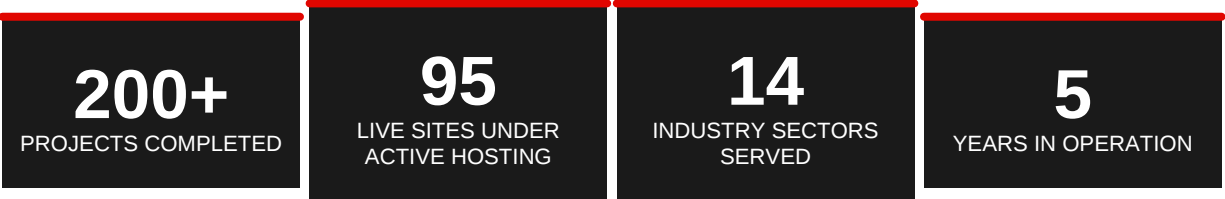

Website Design • Development • Hosting & Management

SINCE 2021 | IBADAN, NIGERIA

About Miracle Seriki Digitals

Miracle Seriki Digitals Limited is a CAC-registered digital project management and web solutions company based in Ibadan, Nigeria. Since 2021, the company has designed, built, deployed and hosted websites for businesses, hospitals, ministries, NGOs, schools, logistics firms, e-commerce brands and professional service providers across Nigeria and beyond, operating under a three-brand ecosystem: **miracleseriki.com** (premium consulting and personal brand), **1HostAfrica.com** (web design and hosting for African SMEs), and **EasyBuyStore.com.ng** (e-commerce).

This portfolio presents a verified snapshot of the company's delivery record: **200+ digital projects completed** to date, spanning website design, custom development, domain and DNS management, managed WordPress hosting, SSL and email configuration, and ongoing technical support. The pages that follow summarise the sectors served, highlight a representative sample of live client projects currently under active management, and walk through a handful of short case studies illustrating the range of work delivered.

Figures above reflect the company's cumulative project record. The 95 domains detailed in this portfolio represent projects currently on active, verifiable managed hosting at the time of publication and are listed by sector on the following pages.

Industry Sectors Served

Sector	Projects	Sector	Projects
Corporate & Professional Services	51	Logistics & Travel	3
NGOs & Foundations	8	Media & Entertainment	3
Education & Training	6	Finance & Consulting	3
Faith-Based & Ministry	5	Engineering & Energy	2
Healthcare & Diagnostics	5	Real Estate & Property	1
Fashion, Beauty & Retail	3	Legal Services	1
E-commerce & Retail	3	Government & Public Sector	1

Selected Case Studies

A representative sample of completed projects across sectors, illustrating the scope of work typically delivered: discovery, design, development, deployment and ongoing managed hosting.

Note: each project listed below was fully functional and delivered to specification at the point of completion. Some sites may since have been taken offline, retired, or discontinued at the owner's discretion — this does not reflect on the quality or completeness of the work delivered.

AVLA One Stop Shop

E-commerce & Retail

avlaonestopshop.com.ng

Brief: A retail brand needed an online storefront to list products and take orders beyond a physical location, with room to grow into a full catalogue.

Work delivered: Designed and deployed a managed WordPress storefront on the Silver hosting tier, with a dedicated business email, SSL encryption, and a structured, mobile-friendly product layout built for easy browsing and ordering.

Outcome: A live, professionally presented online shop that gives the brand a permanent digital storefront, active and maintained since mid-2025.

Prosperous Bible School

Faith-Based & Education

prosperousbibleschool.org.ng

Brief: A bible school needed an online home to present its academic programmes, admissions process and ministry identity to a wider audience.

Work delivered: Delivered a WP Pro-tier build with course/programme pages, admissions information architecture, and a design language consistent with the institution's ministry brand.

Outcome: An accessible digital front door that supports enrolment enquiries and extends the school's reach beyond its physical campus.

EasyBuyStore.com.ng

E-commerce & Retail

easybuystore.com.ng

Brief: An in-house e-commerce brand under the Miracle Seriki Digitals ecosystem, requiring a scalable online storefront on unlimited-resource Gold hosting.

Work delivered: Built and deployed a full e-commerce storefront with product catalogue structure, checkout flow, and unlimited-tier managed hosting to accommodate traffic and media growth.

Outcome: A live, actively managed retail platform demonstrating the same design-to-deployment process used for client projects, run internally as proof of capability.

Felicia Ajani Widows Foundation

NGOs & Foundations

feliciaajaniwidows.org

Brief: A widows' welfare foundation needed a donor- and beneficiary-facing website to communicate its mission and programmes credibly online.

Work delivered: Delivered a full site build on default hosting with capacity for image-heavy programme galleries, since expanded to over 11,000 KB of active content — the largest footprint among the foundation's peer projects.

Outcome: A durable online presence that has remained active and continuously updated since April 2023, supporting the foundation's outreach and credibility with partners.

Sunmade Logistics

Logistics & Travel

sunmadelogistics.com.ng

Brief: A logistics operator required a corporate website to present its services and build trust with commercial clients.

Work delivered: Designed and launched a corporate services website with company-branded email hosting and structured service pages, live since October 2023.

Outcome: A stable, long-running web presence — active for over two years — reflecting the reliability the brand aims to project to its logistics clients.

Curtis Engineering Ltd

Engineering & Energy

curtisengineeringltd.com.ng

Brief: An engineering firm needed a professional online profile to showcase capability to corporate and institutional clients.

Work delivered: Delivered a default-tier corporate website with company email integration, built to present services and credentials clearly to prospective clients.

Outcome: A functioning digital presence in place since November 2023, supporting the firm's business development and credibility efforts.

Full Project Listing

The 95 live domains below represent the portfolio of projects currently under active, verifiable managed hosting, organised by sector. This list is a subset of the company's full 200+ project record; earlier projects transitioned to independent hosting are not reflected here.

Each project was delivered fully functional at completion. Some listed sites may since have been taken offline or retired by the owner; this does not reflect the standard or completeness of the original delivery.
